WORK EXPERIENCE

Sarkor-Telecom *Golang developer*

MAY 2024 – SEPTEMBER 2024

Development of the billing system.

Yandex *Golang developer(Intern)*

JUNE 2023 – NOVEMBER 2023

Setting up load testing for a highly loaded service. Working with Team-City, Yandex Cloud S3 Storage, Yandex Cloud Monitoring, Yandex Database, Yandex Cloud Load Testing. A module has been written to raise the load testing infrastructure and automate the entire process.

MIPT *Programming Teacher*

DECEMBER 2022 – PRESENT

I worked as a teacher at the ZFTSH MIPT for grades 9-11, taught students programming languages Python, C++. I was making up the tasks for the entrance test at the ZFTSH in computer science. Also I worked as an assistant in courses on C++, Algorithms and data structures for 1st year students at MIPT, where I conducted a code review for students.

PET PROJECTS

Secrets Keeper

A service for sending messages that can be read one time during a given time. The service is written in golang, using the Gin framework and Redis as a database, for quick access to messages.

Music Shop

The backend of the marketplace for music trading. The service is written in Golang using the Gin framework and Postgresql as a database.

Products Keeper

Simple REST application on golang(gin, postgres) with JWT authorization.
